Skills

Programming Languages:

C/C++, TypeScript, Java, SQL, Python

Frameworks & Tools:

Node.js, Express.js, React.js, React Native, Flutter, Socket.IO, Docker

Concepts:

Object Oriented Programming, Data Structures & Algorithms, Database Management System (MongoDB, PostgreSQL), REST APIs, JWT Authentication, MVC / MVP / MVVM architectural patterns.

Dev tools:

Git, GitHub, Sublime Text, VS Code, Postman, Expo CLI, Android Studio

Problem Solving

Codeforces (Max Rating 1247)

Handle: [Sharif_Math](#)

Solved Problem: 1250+

LeetCode

Handle: [Sharif_778](#)

Solved Problem: 50+

Onsite Programming Contests

- **Inter Department Programming Contest 2023**, Comilla University
Rank: 7th
- **ICT DAY Programming Contest 2023**, Comilla University
Rank: 13th
- **Orbitax On Campus Recruitment Programming Contest 2023**
Rank: 27th

Education

Bachelor of Science (Honours)

Department of Mathematics,
Comilla University,
March 2018 – March 2023

Master of Science

Department of Mathematics,
Comilla University,
April 2023 – October 2024

Professional Experience

App Developer (React Native)

Offshore Staffing Solutions LTD, Dhaka.

📅 15/12/2025 – Present

- Developed mobile app **UI/UX** using **React Native** with a focus on responsive, animations, and user-friendly design collaborating with project manager.
- Integrated **REST APIs** and handled client-side state management.
- Collaborated with backend team to connect frontend with server-side services.
- Developing a full-stack project using the **React** JavaScript library, with an authentication system and **PostgreSQL** database for scalable data management.

Full-Stack Developer Intern

Dynamite Games Studio, Dhaka.

📅 01/06/2025 – 30/11/2025

- Learned and applied **JavaScript, TypeScript, Node.js, Express.js, Socket.IO, MongoDB, and React.js** for full-stack development.
- Built **three** full-stack applications with authentication and real-time features using **Socket.IO** and deployed via **Docker**.
- Developed reusable and scalable React.js components with efficient API integration and state management for optimized performance.
- Managed backend and databases using **Express.js** and **MongoDB**.
- Explored **React Native basics and animations**, and built mobile applications.

Projects

➤ Connect 4 Online

Description: A real-time two-player online game built with TypeScript, React.js, Socket.IO, and MongoDB, featuring authentication, matchmaking, and live gameplay with automatic win detection and score tracking.

Tools & Technologies: Visual Studio Code, TypeScript, React.js, Node.js, Express.js, Socket.IO, MongoDB, Docker

Key Features:

- Implemented **real-time multiplayer game play** with authentication, matchmaking, score tracking, and disconnection handling using **Socket.IO** and **MongoDB**.
- Designed a **responsive 4-page interface** with player dashboard, match duration selection, and **automated win detection logic** on a 6×7 board.

➤ Tic Tac Toe – Android Game App

Description: A modern Android Tic Tac Toe play with AI and Multi player modes including stopwatch-based tiebreaker in case of a draw.

Tools & Technologies: Android Studio, Java, XML, Android SDK

Key Features:

- Offline play with basic AI opponent.
- Enhances logical thinking and quick decision-making.
